Profile

Innovative Information Technology student combining full-stack development and game design to build scalable web applications and engaging interactive systems. Experienced with modern frameworks, real-time technologies, and data-driven architectures, with a strong focus on performance and clean design.

Education

Institute of Engineering and Technology, DAVV <i>B.Eng (CGPA: 8.0)</i>	Oct 2022 – May 2026 <i>Indore, MP</i>
Gurukul School <i>Class XII CBSE (Senior Secondary) (CGPA: 8.7)</i>	Mar 2020 – Feb 2021 <i>Dhamnod, MP</i>

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, C++, SQL, Python
Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, SCSS
Platforms: MongoDB, Firebase, Supabase, Redis, Unreal Engine 5
Tools: Git, GitHub, Docker

Professional Experience

VasuEternal Virtual Production <i>Digital Art Intern (Website Creations)</i>	Jan 2026 – Mar 2026
- Designed and developed visual assets for company web platforms. - Collaborated with VFX and 3D teams to integrate multimedia elements into UI/UX layouts. - Ensured digital assets aligned with the studio's brand identity and design standards. - Assisted in creating visually engaging web interfaces for multimedia-based projects.	

Projects

Review Guard – Fake Review Detection System	Sep 2025
- Built an AI-driven platform to detect fake, AI-generated, and promotional consumer reviews at scale. - Developed a dashboard with batch analytics, filters, bulk deletion, and export tools. - Implemented NLP pipelines for sentiment, NER, spam/link detection, and AI-generated content scoring. - Designed a composite authenticity scoring model using perplexity, coherence, entropy, and keyword density.	
Link [React.js, Node.js, Express.js, MongoDB, Hugging Face Transformers]	
CloudStore – Cloud Storage Web Application	May 2025
- Developed a full-stack cloud storage platform with authentication, folder navigation, file upload/download, starred, recent, and trash management using React, TypeScript, Firebase, and Supabase. - Implemented secure user authentication, protected routes, real-time file syncing with Firestore, and scalable file storage with Supabase Storage. - Added advanced features including upload progress tracking, global search, recursive folder deletion, and shared storage quota management. - Added authentication-based route protection and session management to secure all private application pages.	
Link [TypeScript, Tailwind, Firebase, Supabase (Storage), React Router]	
3D First-Person Horror Game	Jul 2024
- A horror survival game where players investigate mysterious disappearances and survive against AI-controlled entities. - Developed the game world, mechanics, and visuals using Unreal Engine 5. - Implemented AI behavior, interactions, and game logic using C++ and Unreal Blueprints. - Created immersive ambient and spatial sound effects. - Tweaked Level Streaming, LODs, and Occlusion Culling for improved performance in large environments.
